

Position available for a PhD starting in October 2015 in the Research Laboratory on Human Reproduction, Université Libre de Bruxelles (ULB) located in the Erasme Campus (Anderlecht, Brussels, Belgium). The unit supervised by Dr Demeestere Isabelle is interested in fertility preservation, including mainly ovarian tissue cryopreservation, in vitro follicular growth and pharmacological protection against chemotherapy-induced ovarian damage. Candidates should hold a master degree in Biomedical science or Molecular Biology, have an experience in molecular biology techniques and a good CV. The position is funded for 2 years by the FNRS-Télévie, with possible 2 additional years extension to complete the PhD.

Informal enquiries, CV and names of at least one referee should be send to:
